Journal of Computer-Based Instruction
Autumn 1989, Vol. 16, No. 4, 140-144.

INDEX TO VOLUME 16

AUTHOR INDEX

Key to reading author index —
Author; **issue number**: page number.

Abedi, J.; **1**: 29.

Blombach, A.; **2**: 50.
Brewer, N.; **4**: 122.
Brinkman, A. R.; **2**: 59.
Bruno, J.; **1**: 29.

Carr, A.; **4**: 136.
Cates, W. M.; **1**: 36.
Clark, H. T., III; **3**: 102.
Covington, K.; **2**: 49.
Cunningham, S.; **4**: 122.

ERIC Clearinghouse on Information Resources; **1**: 46; **4**: 137.

Grabe, M.; **3**: 110.

Hannafin, M. J.; **3**: 102.
Harris, C. R.; **2**: 59.
Hativa, N.; **3**: 81.
Hooper, S.; **3**: 102.
Hunka, S.; **4**: 129.

Lang, N. P.; **3**: 90.
Lanza, A.; **4**: 126.
Li, Z.; **3**: 95.
Lippert, R. C.; **1**: 11.
Lovill, J.; **2**: 80.

Mahmood, M. A.; **1**: 20.
Medewitz, J. N.; **1**: 20.
Merrill, M. D.; **3**: 95.

Petros, T.; **3**: 110.

Reigeluth, C. M.; **1**: 1.
Roselli, T.; **4**: 126.

Sawler, B.; **3**: 110.
Schwartz, E.; **1**: 1.
Steinberg, E.R.; **4**: 117.

Ward, T. J.; **3**: 102.
White, J.M.; **4**: 122.
Whiteside, J. A.; **3**: 90.
Whiteside, M. F.; **3**: 90.
Williams, J. K.; **2**: 71.

TITLE INDEX

Assessing the Effect of Computer Literacy on a Subject's Attitudes, Values, and Opinions Toward Information Technology — An Exploratory Longitudinal Investigation Using the Linear Structural Relations (LISREL) Model. Mahmood, M. A., Medewitz, J. N.; **1**: 20.

Book Review. *Computing and Education: The Second Frontier* by R.O. McClintock (Ed.). Carr, A.; **4**: 136.

Book Review. *Foundations of Intelligent Tutoring Systems* by M. C. Polson and J. J. Richardson. Lovill, J.; **2**: 80.

Calculations Required for the Display of Three Dimensional Plots (*Application Report*). Hunka, S.; **4**: 129.

Cognition and Learner Control: A Literature Review, 1977-1988. Steinberg, E.R.; **4**: 117.

Computer-Assisted Instruction in Letter Formation Skills. White, J.M., Cunningham, S., Brewer, N.; **4**: 122.

The Effects of Aptitude Composition on Achievement During Small Group Learning. Hooper, S., Ward, T. J., Hannafin, M. J., Clark, H. T., III; **3**: 102.

ERIC Research Abstracts. ERIC Clearinghouse on Information Resources; **1**: 46; **4**: 137.

An Evaluation of a CBI System for Computer Programming Language. Lanza, A., Roselli, T.; **4**: 126.

An Evaluation of Computer Assisted Study in Controlled and Free Access Settings. Grabe, M., Petros, T., Sawler, B.; **3**: 110.

Expert Systems: Tutors, Tools, and Tutees. Lippert, R. C.; **1**: 11.

An Instructional Design Expert System. Merrill, M. D., Li, Z.; **3**: 95.

An Instructional Theory for the Design of Computer-Based Simulations. Reigeluth, C. M., Schwartz, E.; **1**: 1.

An Integrated Software System for Set-Theoretic and Serial Analysis of Contemporary Music. Harris, C. R., Brinkman, A. R.; **2**: 59.

Introduction to the Special Music Issue. Covington, K.; **2**: 49.

Medical Students' Attitudes Toward the Use of Microcomputers as Instructional Tools. Whiteside, M. F., Lang, N. P., Whiteside, J. A.; **3**: 90.

Research Findings Applied to Software Design: Computerized Instructional Spelling Programs. Cates, W. M.; **1**: 36.

Student Conceptions of, and Attitudes Toward, Specific Features of a CAI System. Hativa, N.; **3**: 81.

Talking Music Theory with a Computer and a Human Being. Williams, J.K.; **2**: 71.

Test-Retest Reliability of Computer-Based MCW-APM Test Scoring Methods. Abedi, J., Bruno, J.; **1**: 29.

Tools for Macintosh Music Courseware Development: Hewlett's Representation system and Structured Programming. Blombach, A.; **2**: 50.

SUBJECT INDEX

a

Acc_id array; **2**: 55.
Active involvement with text; **3**: 110.
Adaptive advisement; **4**: 118.
Adaptive learner control; **4**: 120.
AI in reverse; **4**: 137.
Algorithms for removing hidden lines; **4**: 131.
Allegations about present system of educational computer usage; **4**: 136.
Apple Macintosh; **2**: 50; **3**: 101.
Approaches to handwriting instruction; **4**: 122.
Artificial intelligence; **1**: 11.
Attitudes of medical students toward the use of computers as instructional tools; **3**: 90.
Attitudes of students toward specific features of CAI systems; **3**: 81.
Attitudes toward information technology; **1**: 20.
Attitudes toward the use of simulations; **3**: 90.
Attitudes toward work with the CAI system; **3**: 83.
Aural training courseware on microcomputers; **2**: 50.

b

Beckwith's York Music Project; **2**: 71.
Bitwise manipulation of sets; **2**: 65.
Bivariate function; **4**: 134.
Branching adaptive; **4**: 119.

c

C programming language; **2**: 60.
CAI systems designed to provide drill-and-practice in arithmetic for elementary school students; **3**: 81.
Causal consistency and learnability; **4**: 138.
Causal model progressions as a foundation for intelligent learning environments; **4**: 138.
Causal principles; **1**: 7.
Causal simulation; **1**: 2.
CBI system; **4**: 126.
Characteristics of CAI systems most beneficial to students' learning; **3**: 81.
Children's handwriting patterns; **4**: 122.
CMAP main programs and Function Library; **2**: 60.
Cognition; **4**: 117.
Cognitive research into knowledge acquisition and representation for computer based training; **4**: 138.
Components of system documentation; **1**: 46.
Computer-aided discovery learning in the realm of music theory; **2**: 71.
Computer as material; **4**: 136.
Computer-assisted instruction; **4**: 122.
Computer-assisted music instruction program; **2**: 50.
Computer-assisted study; **3**: 110.
Computer based learning; **4**: 138.
Computer-based patient management simulation; **3**: 90.
Computer-based technique for facilitating student study of textbook assignments; **3**: 110.
Computer conferencing; **1**: 46.
Computer disaster recovery planning; **1**: 46.
Computer ethics; **1**: 48.
Computer literacy; **1**: 20.
Computer programming language; **4**: 126.
Computer simulations of judgments on dossiers of school teacher performance; **1**: 47.
Computer tools that become cognitive; **4**: 137.
Computerized instructional spelling programs; **1**: 36.
Computing and education; **4**: 136.
Concept maps; **4**: 138.
Conditions necessary for internalization of artificial intelligence functions; **4**: 137.
Consequences of accurate letter formation; **4**: 122.
Consistent learning strategy; **4**: 118.
Constraints on model evolution; **4**: 138.
Consultation system; **3**: 95.
Contemporary Music Analysis Package (CMAP); **2**: 59.
Content structure frame; **3**: 96.
Content structure selection rules; **3**: 97.
Control of course flow and structural features of instruction; **4**: 117.
Correct handwriting; **4**: 122.
Courseware development system; **2**: 50.
Critical review of adaptive control systems; **4**: 118.
Cross-contextual transfer of problem solving strategies from Logo to non-computer domain; **4**: 138.

d

DARMS; **2**: 51.
Data Structures; **2**: 66.
DEC VAX 11/780; **4**: 134.
Design and operation of CAI arithmetic drill-and-practice systems; **3**: 81.
Design of computer-based simulations; **1**: 1.
Design properties; **1**: 43.
Determining factors that affect the successful implementation of microcomputers as instructional tools; **3**: 90.

Dialogue between a computer and a music student; **2**: 72.
Differences in operations of CAI systems; **3**: 81.
Different approach to laboratory activity; **4**: 128.
Digitized graphics tablet; **4**: 123.
Dynamic locus of control; **4**: 120.

e

Educational Language Facility (Elf); **4**: 134.
Effectiveness of a CBI system; **4**: 126.
Effectiveness of computer-assisted instruction; **3**: 81.
Effectiveness of on-line study management; **3**: 111.
Effects of aptitude composition on achievement; **3**: 102.
Effects of CAI system characteristics on students different in gender or aptitudes; **3**: 81.
Effects of group composition on different levels of questioning; **3**: 103.
Efficacy of copying vs. tracing; **4**: 122.
Electronic mail and seminars; **1**: 46.
Elements of pitch and interval representations; **2**: 54.
Elf (Educational Language Facility); **4**: 134.
Encouraging teachers to use computers to promote alternative presentations of learning materials rather than be limited to text; **4**: 136.
Evaluation of computer assisted study in controlled and free access settings; **3**: 110.
Expert system, components; **1**: 12.
Expert system knowledge base; **1**: 47.
Expert systems; **1**: 11.
  as tools; **1**: 13.
  as tutees; **1**: 14.
  as tutors; **1**: 12.
  in education; **1**: 11.
Exploring fundamental concepts of musical structure and style; **2**: 71.
Exploring the concept of repetition in musical form; **2**: 71.

f

Features in class arithmetic absent in CAI arithmetic preferred by students; **3**: 85.
Features of simulations; **1**: 3.
Feedback; **4**: 119.
Fidelity of the scenario and model; **1**: 1.
Focus on learning processes; **4**: 120.
Fortran, version V4.8; **4**: 134.
Frames; **3**: 96.
"Free-rider" effects; **3**: 105.
Functions of simulations; **1**: 2.
Future development of computer study tools; **3**: 115.
Future possibilities of computing and education based on the past; **4**: 136.

g

General areas of research; **4**: 117.
General components of effective study; **3**: 110.
General model for simulations; **1**: 4.
Goal consultation; **3**: 99.
Group composition effects on learning by college students; **3**: 107.
GUIDON rule-based tutoring system; **4**: 138.

h

Hewlett's pitch representation system; **2**: 50.
Hidden line problem; **4**: 130.
Hypertext system; **4**: 138.

i

ID Expert; **3**: 95.
IF-THEN rules of ID Expert; **3**: 97.
Imagery/Associative Learning; **1**: 42.
Imagery strategies; **1**: 42.
Impact of computer assisted study on examination performance; **3**: 110.
Impact of on-line study in a free choice setting; **3**: 111.
Implementing microcomputers into medical school programs; **3**: 90.
Importance for AI researchers to address the social impacts of integrating technology into classrooms; **4**: 136.
Importance of metacognitive monitoring behaviors; **3**: 110.
Imposing gradual reductions in tolerance; **4**: 122.
Inference engine; **1**: 12.
Influence of small group aptitude composition on performance; **3**: 103.
Information processing; **4**: 118.
  strategies; **1**: 41.
Information Processing Theory; **1**: 40.
Input/output pipes; **2**: 61.
Instructional design expert system; **3**: 95.
Instructional design model for microcomputer training seminars; **1**: 47.
Instructional overlays; **1**: 2.
Instructional spelling program: **1**: 36.
Instructional System Development; **3**: 95.
Integrated software system; **2**: 59.
Intelligent learning environment; **4**: 138.
Intelligent tutoring systems; **1**: 12; **2**: 80.
Interacting with a language translator program; **4**: 126.
Interactive computing environment; **2**: 59.
Interactive video systems, their promise and educational potential; **4**: 136.
Interactive videodisc; **4**: 139.
Intersection and visibility change; **4**: 133.

k

Kinds consultation; **3**: 99.
"Kinds-of" taxonomy frame; **3**: 96.
KINDS TAXONOMY; **3**: 95.
Knowledge bases; **1**: 12.
Knowledge clarification; **1**: 14.
Knowledge engineering approach to design systems; **3**: 95.

Knowledge engineering, components; **1**: 12, 14.
Knowledge representation; **3**: 96.

l

Laboratory learning of programming languages; **4**: 126.
Language compiler; **4**: 126.
Learner control of instruction; **4**: 117.
Learner control with advisement; **4**: 118.
Letter formation skills; **4**: 122.
Linear Structural Relations (LISREL); **1**: 20.
Logical Consistency Percentage (LCP); **1**: 33.
Logo; **2**: 71.

m

MacSMARTS; **1**: 47.
Major findings prior to 1977; **4**: 117.
"Mathetic" principles by Pascal; **2**: 72.
MCW-APM test reliability; **1**: 31.
Medical students attitudes; **3**: 90.
Metacognitive skills; **4**: 118.
Methods of music symbol representation for computer processing of musical information; **2**: 51.
Methods of providing computer support to learner control; **4**: 117.
Microworlds; **1**: 12.
Model for music analysis; **2**: 59.
Model of a simulation; **1**: 1.
Modified confidence weighted-admissible probability measurement (MCW-APM) test scoring methods; **1**: 29.
Most- and least-likable aspects of CAI work; **3**: 84.
Motivational effects of learner control; **4**: 117.
Music analysis and computers; **2**: 59.
Music courseware development; **2**: 50.
Music software and development system; **2**: 53.
Musicode-A; **2**: 52.

n

Nature of concept maps; **4**: 138.
NEOMYCIN's generalization in the heuristic classication shell, HERCULES; **4**: 138.
NEXPERT expert system shell; **3**: 101.
NoteCards; **4**: 138.
Numeric representation of musical data; **2**: 52.
Numeric representation of pitch-class sets; **2**: 65.

o

Obstacles to children learning computer programming; **1**: 47.
On-line study management; **3**: 111.
Opinions toward information technology; **1**: 20.
Organization of the ID Expert consultation system; **3**: 99.
Overview of the computer's roles in education; **1**: 12.

p

Pascal programming language; **2**: 50; **4**: 126.
PATH ALGORITHM; **3**: 95.
Patterns of attitudes by achievement level; **3**: 87.
Phases in the learning process; **1**: 2.
Phonology vs. visuality/orthography; **1**: 38.
Pico-Fomi; **4**: 119.
Piecemeal processing; **3**: 110.
Pit_id array; **2**: 55.
PLATO (Programming Logic for Advanced Teaching Operations); **4**: 137.
  evolution; **4**: 137.
Plotting three-dimensional graphs; **4**: 129.
Preference of class arithmetic vs. CAI arithmetic; **3**: 84.
"Probeware"; **1**: 46.
Procedural simulations; **1**: 2.
Procedure for developing multimedia instructions; **4**: 139.
Procedures and functions to translate representations of pitch information; **2**: 55.
Process principles; **1**: 7.
Process simulation; **1**: 2.
Proficiency of communication skills as an influence on small group learning; **3**: 108.
Programming Logic for Advanced Teaching Operations (PLATO); **4**: 137.
Programs for dealing with atonal and serial music; **2**: 59.
Prototype expert instructional design system; **3**: 95.
Pseudo-code statements; **2**: 51.

q

Question of whether human thinking can come to simulate computer intelligence; **4**: 137.

r

R-W test reliability; **1**: 31.
Recommendation for future research; **4**: 120.
Reconfiguration of MYCIN into NEOMYCIN; **4**: 138.
Reducing "free-rider" effects on performance; **3**: 106.
Relationship between learning to program LOGO and the development of problem solving skills; **4**: 138.
Removing the hidden lines; **4**: 131.
Research on handwriting instruction; **4**: 122.
Research since 1977; **4**: 117.
Review of the CAI literature; **4**: 117.
Role of practice in videodisc-based procedural instructions; **4**: 139.
Roles of modeling and tracing; **4**: 124.
Rotations to achieve a different perspective; **4**: 130.

s

S.1 expert system shell; **3**: 95.
Sample dialogue of the ID Expert consultation system; **3**: 99.
Scenario of a simulation; **1**: 1.
Second frontier of computing and education; **4**: 136.
Selecting an algorithm; **4**: 135.
Sequence; **4**: 119.
Set-class table; **2**: 67.

Set-theoretic and serial analysis of contemporary music; **2**: 59.
Shared control of instruction; **4**: 120.
Shell scripts; **2**: 61.
Simple algorithms for removing hidden lines; **4**: 131.
Simulation; **1**: 1.
Small group learning; **3**: 102.
Software design; **1**: 36.
Spelling research; **1**: 36.
Stages of complete documentation; **1**: 46.
Structural aspects of instruction; **4**: 117.
Structural features of instruction; **4**: 119.
Structured programming; **2**: 50.
Student attitudes toward a CAI system; **3**: 81.
Student attitudes toward learning with computers; **3**: 81.
Student conceptions of a CAI system; **3**: 81.
Students' attitudes broken into students' gender; **3**: 87.
Students' attitudes broken into students' grade level; **3**: 88.
Students' attitudes broken into students' SES level; **3**: 88.
Students' behaviors when receiving unfamiliar types of exercises in CAI; **3**: 86.
Students' reasons for disliking work with the CAI system; **3**: 84.
Students' reasons for liking work with the CAI system; **3**: 83.
Students' strategies under learner control; **4**: 117.
Study behavior; **3**: 110.
Support for earlier findings; **4**: 120.

t

Talking music theory; **2**: 71.
Taxonomy of models useful for instruction; **4**: 138.
Teaching by dialogue using a computer; **2**: 71.
Teaching computer ethics; **1**: 48.
Terrapin™ Music Logo; **2**: 72.
Test-retest reliability experiments; **1**: 29.
Test scoring methods; **1**: 29.
Think's Lightspeed Pascal; **2**: 50.
Three-dimensional plotting; **4**: 129.
Three-dimensional representation of functions; **4**: 129.
Tools for learning; **4**: 119.
Tools for the analysis of contemporary music; **2**: 60.
Transaction frame; **3**: 96.
Transaction selection rules; **3**: 98.
Trends in research; **4**: 120.

u

UNIX operating system environment; **2**: 60.
Use of microcomputers as instructional tools; **3**: 90.
Use of static vs. dynamic models; **4**: 122.
Using Logo to explore music; **2**: 71.

v

Values toward information technology; **1**: 20.
Variables in computer programming; **1**: 47.
Variations on the general model; **1**: 6.
VAX computer; **3**: 95.

w

Ways that maps can facilitate knowledge elicitation; **4**: 138.
Wolf-Welsh Linkage Methodology (WWLM); **4**: 137.
